- * IP Network Security and UTM
- * Professional Services

Lan 1 is a value-added distributor, bringing together a variety of IP Surveillance, IP Networking, IP Storage and IP Security products to assist resellers and system integrators in creating complete IP-based CCTV ecosystems. Lan 1's main aim is to provide partners with the knowledge, accreditation and skills to effectively market, sell, implement and support complete IP Ecosystems.

With over 15 years experience in the IP industry, Lan 1, through a nationwide network of partners, has worked on a wide range of IP Surveillance projects for high profile users such as Rockdale City Council, Swinburne University of Technology and Perth Ferries to name a few. Throughout these projects Lan 1 was on hand to assist the SI's to assess, design, implement and service their customer's mission critical IP Surveillance infrastructure.

To support our partners, Lan 1 offers a range of professional services including onsite and remote support, configuration and installation to ensure partners are capable of offering a satisfactory solution to the end user. Lan 1 also keeps SI's and Consultants up-to-date with the latest IP-based technologies through product workshops and seminars, and can provide assistance with lead generation and marketing activities to increase sales opportunities.
